

# POST-TEST

## An E-tutorial from University of Manitoba for the Bridge Project

**You will be assessed for this test. The pass percentage is 80% for entitlement to a certificate. A certificate from the Bridge Project, FHI360 and University of Manitoba will be e-mailed in less than a week. You can try any of our e-tutorials any number of times.**

### 1. Who is an IDU?

- a) IDUs are those who used any drugs through injecting routes in the last one month.
- b) IDUs are those who used any drugs through injecting routes in the last six months.
- c) IDUs are those who used any drugs through injecting routes in the last three months.
- d) None of the above.

### 2. What are the outreach strategies in a targeted intervention for drug users?

- a) Harm Reduction
- b) Commodities and services provided through the targeted intervention.
- c) Linkages provided through the targeted intervention
- d) All the above

### 3. What is a Needle Syringe Exchange Program?

- a) It is program that involves the used needles and syringes to be collected from the IDUs or hot spots.
- b) It is a program that involves giving IDUs new needles and syringes to ensure there is no 'sharing' of needles and reduce transmission of HIV among IDUs.
- c) Both
- d) None of the above

### 4. What is Opioid Substitution Therapy?(Which statement defines it best)

- a) It is a medical intervention in a clinical setting for injecting drug users.
- b) It is a therapy to transition injecting drug users from the injecting mode to non-injecting mode of drug administration by the use of buprenorphine or methadone drugs administered under medical supervision in the OST centre.

- c) It is facility based program which links injecting drug users to other HIV services of ICTC, ART and so on.
- d) None of the above.

**5. Who is a peer educator? (Which statement defines the PE best)**

- a) A peer educator is current or ex-IDU performing the role of an educator for other IDUs. The frontline workers, peer educators form the main link between IDUs and outreach program services.
- b) A peer educator is a counselor who educates IDUs on the benefits of safe sex and safe injecting behavior.
- c) A peer educator is a volunteer who encourages school drop-outs among IDUs to rejoin school.
- d) None of the above

**6. An outreach kit includes the following items in his bag:**

- a) A puncture-proof container to receive used syringes and needles.
- b) Condoms, needles and syringes.
- c) Needles and syringes, condoms, penis model, disposable gloves, cotton, bandage, spirit, betadine ointment and lotion, scissors, sterilized gauze, puncture-proof container to receive used syringes and needles and IEC material.
- d) IEC materials.

**7. What is a Drop in Centre?**

- a) It is a centre in the premises of a government hospital where HIV testing is done for IDUs.
- b) It is a centre that provides IDUs with all services an IDU and their partners cannot access through outreach alone and include services of needle syringe, condoms, abscess management, STI management(syndromic), counseling, referrals, group discussions, recreation/rest.
- c) Both
- d) None of the above

**8. It is a good idea to have strategies to reach spouses/partners of IDUs because:**

- a) If unaddressed the spouses and partners of IDUs can act as a 'bridge population', carrying infection from the IDUs into the general population.
- b) The de-addiction process for an IDU requires understanding and support from the family especially the spouse or partner of the IDU.
- c) Both of the above
- d) None of the above
